

Product Requirements Document (PRD)

Just us

Version: V1

Status: Initial Build

Product Vision

Just us is a private digital space built exclusively for Aswin and Anu.

This is not intended to be a memory-keeping application.

This is intended to become a personalized app for our relationship.

Over time, the app will contain multiple custom features designed specifically for us, our routines, our milestones, our plans, and our shared life.

The first feature being built is the Memories Timeline.

Future features may include:

- Shared bucket lists
- Places we want to visit
- Gift ideas
- Relationship milestones
- Important dates
- Travel plans
- Shared journals
- Personal dashboards
- Custom tools unique to us

The app should feel like our own private corner of the internet.

Product Philosophy

The goal is not to create another social app.

The goal is not to create another photo gallery.

The goal is not to create another journal.

The goal is to create a private digital home that belongs only to us.

Every feature should answer one question:

“Would this make Just us feel more like our own space?”

If the answer is no, it should not exist.

Platform

The application will be built as a mobile-first web application packaged inside an Android APK.

The design should therefore follow modern mobile web patterns.

The application should feel similar to using Airbnb’s mobile website.

Design Inspiration

Primary Inspiration:

Airbnb Mobile Website (Light Theme)

Characteristics:

- Large imagery
- Clean white layouts
- Rounded cards
- Spacious design
- Premium typography
- Minimal visual noise
- Elegant navigation
- Soft shadows
- High-quality spacing

The experience should feel modern, premium, and calm.

Avoid:

- Dark mode by default
- Social media design patterns
- Heavy gradients

- Neon colors
 - Gamification
 - Excessive animations
-

App Identity

App Name:

Just us

Tagline:

A space that's ours.

App Icon

Visual Inspiration:

Airbnb's Bélo icon.

Requirements:

- Rounded square icon
- White background
- Deep blue symbol
- Stylized letter "A"
- Represents both Aswin and Anu
- Geometric and minimal
- Premium lifestyle aesthetic
- No hearts
- No text
- No gradients

Primary Color:

#014F86

The icon should feel like it belongs alongside Airbnb, Notion, Apple Journal, and Arc.

Design System

Color Palette

Primary Accent:

#014F86

Used for:

- Buttons
 - Active states
 - Selected tabs
 - Links
 - Icons
 - Highlights
-

Background:

#FFFFFF

Pure white

Primary Text:

#222222

Deep charcoal

Secondary Text:

#717171

Airbnb-style muted gray

Card Background:

#FFFFFF

Border Color:

#EBEBEB

Success:

#2E7D32

Typography

Style should closely resemble Airbnb.

Characteristics:

- Clean
- Modern
- Friendly
- Human

Use:

- Medium weight headings
- Regular weight body text
- Large section titles
- Comfortable line spacing

Avoid decorative typography.

Authentication

Purpose

The application is deeply personal and should remain private.

First Launch

User creates a 6-digit passcode.

Screen Elements:

Logo

App Name

Create Passcode

Subtitle:

Protect your space with a 6-digit passcode.

Passcode Input

Confirm Passcode

Continue Button

Returning Users

Passcode Entry Screen

Layout:

Centered Logo

App Name

Passcode Dots

Numeric Keypad

Simple white background

No additional UI elements

Incorrect Passcode

Message:

Try again.

Subtle animation only.

No aggressive warning messages.

Application Structure

Bottom Navigation

Timeline

Settings

Floating Action Button

Add Memory

Timeline should be the default screen after unlocking.

This is where users will spend most of their time.

V1 Feature

Memories Timeline

Feature Objective

Create a beautiful chronological record of meaningful moments.

The timeline should feel like browsing chapters of a story rather than scrolling through a feed.

Memory Types

Each memory belongs to a category.

Categories:

First

Milestone

Trip

Gift

Moment

Quote

Celebration

Special Day

Categories are used for organization and visual identity.

Timeline Screen

Purpose

Primary experience of the application.

Layout

Vertical scrolling timeline.

Grouped by year.

Newest memories first.

Example

2026

[Memory Card]

[Memory Card]

2025

[Memory Card]

[Memory Card]

Timeline Card Design

Cards should follow Airbnb-inspired design principles.

Card Structure:

Optional Image

Memory Type

Title

Date

Description Preview

Example:

[Image]

The Postcard Painting

21 Jun 2026

The first painting I gifted Anu.

Image Handling

If image exists:

Large edge-to-edge image

Rounded corners

High visual priority

If image does not exist:

Beautiful text-focused card

Maintains visual balance

Year Navigation

Sticky Year Selector

Appears while scrolling.

Example:

2026

2025

2024

2023

Tap any year to jump instantly.

Add Memory

Entry Point

Floating Action Button

Blue circular button

Bottom-right corner

Uses primary accent color.

Form Fields

Memory Type

Title

Date

Description

Photo (Optional)

Location (Optional)

Save Button

Validation

Required:

Title

Date

Optional:

Description

Photo

Location

Save Experience

After save:

Smooth transition back to timeline.

New memory appears in chronological position.

Memory Detail Page

Purpose

A memory should feel like opening a chapter from a book.

Layout

Large image

Category

Title

Date

Location

Description

Whitespace focused design.

Example:

[Large Image]

Gift

The Postcard Painting

21 Jun 2026

The first painting I gifted Anu before our date.

Empty State

If no memories exist.

Illustration

Headline:

Start Our Story

Subheadline:

Add your first memory to begin building your timeline.

Primary Button:

Add First Memory

Settings

Purpose:

Configure relationship information.

Fields

Partner One Name

Partner Two Name

Relationship Start Date

Passcode Change

Cover Photo

Relationship Header

Displayed at top of timeline.

Example:

Aswin & Anu

842 Days Together

The day count should be automatically calculated using the configured relationship start date.

Animations

Keep animations subtle.

Examples:

Card fade in

Screen slide transition

Image fade transition

Passcode dot animation

No excessive motion.

V1 Scope

Included

Passcode Authentication

Timeline

Add Memory

Memory Details

Memory Categories

Photo Upload

Relationship Settings

Days Together Counter

Year Navigation

Timeline Grouping

Future Vision (Not V1)

The architecture and navigation should anticipate future modules.

Potential future sections:

Wishlist

Travel Plans

Places To Visit

Date Ideas

Gift Ideas

Relationship Dashboard

Shared Notes

Private Journal

Custom Utilities

Surprises

The long-term vision is that Just us becomes our personalized relationship operating system.

The Memories Timeline is simply the first chapter.

Success Criteria

The application should feel:

Private

Personal

Warm

Elegant

Premium

Timeless

When opened, it should feel less like launching an app and more like stepping into a space that belongs only to Aswin and Anu.
